

# CaringAlerts™

The Intelligent scheduling system for home care patients

The CaringAlerts system is designed to improve home care patient outcome by bringing simplicity and clarity to what can be a confusing and complicated schedule for home care patients. The CaringAlerts system makes it quick and easy to define a patient's schedule of medication, therapy, appointments, meals and so on. Using state-of-the-art mobile technology, the patient always knows what they need to do and when they need to do it. Real-time responses from the patient keep the care givers as well as friends and families instantly connected no matter where they are.

## CaringAlerts™ Monitoring System

- ➔ For use by professionals or family members to manage the patient's activity
- ➔ Easily set up patient's schedule
- ➔ Uses "Smart Scheduling" for simplicity and flexibility.
- ➔ Graphs and logs of patient's behavior are captured and available.
- ➔ Audio or text messages can be sent to the patient's message center
- ➔ Patient response alerts can be texted or emailed to friends and family so they too can stay in touch

## CaringAlerts™ Patient Device

- ➔ Designed for simplicity and ease of use at home
- ➔ Patient's next task event is always visible
- ➔ Visible and audible cues draw the patient's attention
- ➔ One touch to see daily schedule
- ➔ Patient activity captured and reported in real time
- ➔ Point/reward system keeps patients using device
- ➔ Schedule adjusts based on patient behavior
- ➔ Message center allows patients to hear and leave voice messages

Works on a variety of devices including iPhone, iPod, and the new iPad
